

PIMBA MOHAMED

SOFTWARE ENGINEER

About Me

I'm a dedicated full-stack web developer from Cameroon, with hands-on experience from an internship at QTA TECH SARL and projects at TechSoft Web Agency, crafting dynamic web and mobile applications. I specialize in building seamless frontends with React.js and robust backends using Node.js, Express.js, and MongoDB, ensuring user-friendly and scalable solutions

Experience

QTA TECH SARL 2022 - 2023
Intership Junior Dev

Full-Stack Development: Gained hands-on experience in AI-based website creation and mobile app development using React.js
Automated Solutions: Utilized Python and JavaScript to build dynamic web components, streamlining the agency's development lifecycle

TechSoft Web Agency 2023 - 2025
Backend Dev

- Scaled Infrastructure: Architected and maintained scalable APIs for e-commerce platforms serving over 100,000 active users, ensuring high availability and seamless data flow.
- Database Optimization: Optimized MongoDB and MySQL database schemas and indexing strategies, achieving a 40% reduction in query response times for complex data retrievals.
- AI Integration: Developed and integrated an AI-powered chatbot using prompt engineering to automate customer support within a production web application.
- System Architecture: Leveraged Node.js and Nestjs to build modular CMS solutions in an Agile environment, improving content delivery speeds.

Education

2021
Douala University
Bachelor
Completed with commendable grades in a rigorous engineering curriculum.

2020
Douala University
HND
Ranked 3rd in class out of all graduating students
